## >PROFESSIONAL EXPERIENCE

### Lambda School | Front End Engineer

2018 - Present

- Extensive code reviews and provided one on one feedback for the projects used React, CSS&HTML and NodeJS.
- Resolved conflicts and assisted with personal issues through remote working tools such as Slack and Zoom.
- Applied styles to React components along with handling HTTP requests.

### Zeus Motors | Web Developer + Co-founder | San Rafael, CA

2015 - 2018

- Engineered vehicle profit estimation tool utilizing JavaScript, Node, ReactJS, MongoDB, HTML5 and CSS3 which assisted in generating over \$1 million gross sales in first year of business while reaching \$500k credit line access from lenders.
- Designed responsive front end views for estimation tool for use across all major browsers (Chrome, Firefox, Safari, Internet Explorer) using JavaScript, HTML5 and custom CSS3 media queries.
- Optimized lead generation tracking system by ~13% through integrating MyDealerCenter into company sales process.

### San Rafael Smog | General Manager + Co-founder | San Rafael, CA

201 - 2015

- Achieved 500% revenue growth over 2 year period while grossing \$300k in sales in first year of ownership transition.
- Elevated company satisfaction index to [110 five-star Yelp reviews](#) (from 20), ensuring swift resolution of customer issues to preserve and grow brand loyalty.
- Sold the business with 1000% profit after growing daily customer rate to 30 vehicles daily (up from 6 cars) with online marketing techniques utilizing Google and Yelp.

---

## >RECENT PROJECTS

### La Cocina | Software Engineer | [code](#)

2019

*Site to query recipes by searching an ingredient along with diet types.*

- Integrated RESTful API using ReactJS with Edamam API to retrieve recipes by searching an ingredient as well as a diet type.
- Conducted asynchronous API calls using ReactJS components to display recipes.

### CarDex | Software Engineer | [code](#)

2018

*Platform to mentor prospective vehicle buyers to make more informed decisions by providing NHTSA safety ratings and real customer reviews.*

- Architected RESTful API using NodeJS and ReactJS with Edmunds and Yelp API integration to provide car buyers with 10+ customer and dealer reviews and safety ratings per vehicle.
- Reduced frontend codebase by ~50% through using backend templating with components in ReactJS.

### GuideMe | Software Engineer, Front-End | [live](#) | [code](#)

2017

*Tour guide marketplace to simplify the sightseeing process by connecting travelers with destination locals in cities and towns around the globe.*

- Enabled real-time (< 1 sec delay) chat communication with potential tour guides using Ruby on Rails and JavaScript.
- Designed 8 mobile responsive views to facilitate guide-tourist interaction using JavaScript, HTML5 and CSS3, ensuring compatibility across 5+ major browsers and devices.
